

SIDHARTHA PULLURI

Northlake, TX, USA | 214-475-4851 | Sidhartha1729@gmail.com | linkedin.com/in/sidhartha-pulluri-7a9150238
github.com/SidharthaPulluri | sidhartha-portfolio-three.vercel.app

PROFESSIONAL PROFILE

Computer Science graduate student with hands-on experience building generative AI, machine learning, computer vision, and automation systems from development through deployment. Strong foundation in Python, SQL, Flask, TensorFlow, PyTorch, and production-minded application design across repo-backed projects, research, and data workflows.

EDUCATION

The University of Texas at Dallas, Richardson, TX

Expected Dec 2027

Master of Science in Computer Science | GPA: 3.77/4.00

Relevant Coursework: Artificial Intelligence, Natural Language Processing, Database Design, Statistical Methods, Data Analysis

Chaitanya Bharathi Institute of Technology, Hyderabad, India

May 2025

Bachelor of Technology in Artificial Intelligence and Machine Learning | CGPA: 8.7/10

TECHNICAL SKILLS

Programming: Python, SQL, R, JavaScript

AI and ML: PyTorch, TensorFlow, Keras, scikit-learn, Hugging Face Transformers, Transfer Learning, CNNs

Generative AI and Automation: Conversational AI, prompt-driven workflows, text-to-speech pipelines, batch processing, API integration, workflow automation

Data and Backend: Pandas, NumPy, Data Cleaning, Feature Engineering, Model Evaluation, Flask, SQLite, MySQL, PostgreSQL

Tools and Deployment: Git, GitHub, Vercel, Railway, Docker, Jupyter Notebook, Google Colab, Tableau

PROJECT EXPERIENCE

YouTube Shorts Story Generator

GitHub-backed

github.com/SidharthaPulluri/Yt-shorts-story-generator

- Built and deployed a Flask-based story-to-video pipeline that converts raw text into 9:16 short-form videos with AI voice narration, timed captions, and optional YouTube upload support.
- Added both web UI and CLI workflows with environment-based configuration, health endpoints, and cloud deployment readiness using Docker and Railway.
- Supported repeatable content generation through batch-oriented processing, file upload inputs, and structured runtime logging.

Returnly | QR Lost and Found Platform

Live + GitHub-backed

github.com/SidharthaPulluri/Qr-Returnly-site | qr-returnly.vercel.app

- Built and deployed a QR-powered lost-and-found platform with owner login, signup, email verification, item dashboards, finder reports, QR downloads, and item management flows.
- Implemented production-oriented data handling with PostgreSQL support in production and SQLite fallback for local development.
- Shipped a live recovery workflow that supports real scans, owner actions, and finder submissions without requiring QR regeneration.

Ayurvedic Herb Scraper

GitHub-backed

github.com/SidharthaPulluri/Ayurvedic-herb-scraper

- Built a Python CLI scraper for the Planet Ayurveda herbs directory with index and detailed scrape modes, configurable ranges, retries, timeouts, and CSV export.
- Improved scraper reliability through reusable parsing utilities, safer output paths, pause controls, and logging for long-running collection workflows.
- Produced structured datasets for exploratory analysis, search, labeling workflows, and downstream medicinal plant ML experimentation.

Sidhartha Utilities | Full-Stack To-Do and Utility Hub

GitHub-backed

github.com/SidharthaPulluri/My-Utilities | sidhartha-utilities.vercel.app/todo

- Built and deployed a multi-utility web platform featuring a React and Vite to-do application with REST-backed CRUD workflows and Vercel serverless API routing.
- Integrated static utility experiences and backend-connected task management into a single deployable user-facing product.
- Added build automation for the todo client and deploy-ready routing to support consistent Vercel releases.

Medicinal Leaf Classification Research

Publication-backed

- Developed a custom medicinal leaf classification workflow using EfficientNetB0 and BiFPN-inspired modeling for medicinal plant identification.
- Built an interactive inference interface for real-time prediction and result visualization.
- Connected experimentation and evaluation into a publication presented at ICICT-2024.

PUBLICATIONS

EfficientDet-Based Framework for Medicinal Leaf Detection and Therapeutic Usage

International Conference on Innovative Computing Technologies (ICICT-2024), Hyderabad

LEADERSHIP EXPERIENCE

Placement Coordinator, AIML Section

Chaitanya Bharathi Institute of Technology

- Coordinated communication among students, recruiters, and faculty during placement cycles.

- Maintained tracking sheets, updates, and follow-ups to support milestone completion.

CERTIFICATIONS

- Data Science Foundation
- Machine Learning
- Introduction to Databases (SQL)
- Full Stack Development

ADDITIONAL INFORMATION

- Open to internships and full-time opportunities in Generative AI, Machine Learning, and Data Science.
- Open to relocation within the United States.
